

## SC-12 Subwoofer SubContractor™ Series

REFERENCE QUALITY CUSTOM INSTALLATION SUBWOOFERS

Velodyne Acoustics, the #1 rated subwoofer company for over 20 years, now offers the SubContractor Series - a powerful, easy-to-install line of subwoofers with an outboard, rack-mountable amplifier specially designed for any custom installation need.

The SC-12 features a powerful 12" woofer in a compact cabinet. Its small size, shallow depth, and flush rear panel allow it to fit anywhere. It connects to the SC-1250 amplifier with conventional speaker wire, for maximum placement flexibility. The SC-12 can be placed facing downward, for venting through the kick plate of a custom cabinet. No other subwoofers offer the compact, powerful, low-distortion bass of the SC Series!

### Features

- Outboard amplification for ease of placement using conventional speaker wire
- Small and shallow – just 14.9" x 14.4" x 9.9" (HWD) including grill and feet
- Front-firing, sealed cabinet can be placed down-firing (feet included)
- Elegant black pica finish
- The matched SC-1250 amplifier can power one or two SC-12 subs (amp sold separately)

### Powerful, Linear Drivers

The SC Series employs Velodyne's multi-layer, Kevlar reinforced, resin cones mounted in die-cast aluminum baskets with massive magnet structures. Each driver incorporates Velodyne's unique dual-wound voice coil that assures linear travel and allows for the heat dissipation needed to handle the gigantic power output of the SC-1250 amplifier.

### Easy to Install and Configure

Placement of the SC-12 is easy due to its compact size, outboard amplifier, and recessed speaker wire connector. The SC-1250 rack-mountable amplifier features 3000 watts dynamic power and 1250 watts of continuous RMS power. The SC-1250 also comes with DSP control, a built-in 7-band automatic room EQ, 12-volt trigger, IR repeater jack, RS-232 control port (Crestron Certified), and a full-featured remote with factory listening presets. Standard speaker wire is used to connect the SC-1250 to the SC-12. The SC-1250 can power up to TWO SC-12 subs.

**The SubContractor Series Subwoofers — a sub for every situation.**

You'll be blown away by the *hidden thunder* of the SubContractor Series subs!
